

Federal Communications Commission  
Washington, D.C. 20554

JUN 2 1997

The Honorable Steve Largent  
U. S. House of Representatives  
2424 East 21st Street, Suite 510  
Tulsa, Oklahoma 74114-1741

Dear Congressman Largent:

Thank you for your letter of March 26, 1997, on behalf of your constituent, Lee P. Andrews, regarding the Commission's policies with regard to licensing of 931 MHz paging systems. Mr. Andrews expresses concern that his paging application will be dismissed and that paging frequencies will be awarded in a competitive bidding process.

On February 20, 1997, the Commission released a Second Report and Order and Further Notice of Proposed Rule Making in WT Docket 96-18 and PP Docket 93-253, which adopted rules governing geographic area licensing for Private Carrier and Common Carrier paging licenses and established competitive bidding procedures for those systems. For your convenience and information, enclosed is a copy of the Press Release concerning the Second Report and Order and Further Notice of Proposed Rule Making, which includes a summary of the principal decisions made. Specifically, all mutually exclusive applications for non-nationwide Common Carrier Paging licenses and exclusive non-nationwide Private Carrier Paging channels will be subject to competitive bidding procedures. Additionally, all pending mutually exclusive applications filed with the Commission on or before February 20, 1997, will be dismissed.

The Commission's interim paging freeze did not require prior issuance of a Notice of Proposed Rule Making. Indeed, the Commission has imposed freezes in a number of other proceedings to facilitate the transition to geographic licensing and auctions, including Multipoint Distribution Service, 800 and 900 MHz Specialized Mobile Radio (SMR) Service, Location and Monitoring Service, 220 MHz Service and 39 GHz Service. Our decision in these proceedings to suspend acceptance of applications while the related rulemaking was pending advances two critical goals -- preservation of our ability to assign licenses through auctions, and deterrence of license fraud and speculation. In particular, we are concerned that the potential benefits of geographic area licensing, with competitive bidding used to select from among competing applicants, would be undermined by continuing to invite site-specific applications for "free" spectrum on a first-come, first-served basis.

Assigning frequencies by auction, in turn, helps deter fraud and speculation and ensures that this valuable public resource is assigned rapidly and efficiently to the parties who value it the most, rather than given away to the first party who files its application with the Commission. The Commission has stated its belief in other contexts (such as Specialized Mobile Radio) that auctions will minimize administrative or judicial delays in licensing, particularly in comparison to other licensing methods such as comparative hearings, lotteries (which are specifically prohibited by the statute if the service is auctionable), or "first-come, first-served" procedures.

The Commission's newly adopted rules to auction paging frequencies is consistent with Section 309(j) of the Communications Act, which sets forth certain criteria for determining when auctions should be used to award spectrum licenses. Pursuant to these criteria, auctions are to be used to award mutually exclusive initial licenses or construction permits for services likely to involve the licensee receiving compensation from subscribers. The statute also requires that the Commission determine that auctioning the spectrum will further the public interest objectives of Section 309(j)(3) by promoting rapid development of service, fostering competition, recovering a portion of the value of the spectrum for the public, and encouraging efficient spectrum use.

Moreover, the Commission has taken a number of steps to ensure that paging providers that are small businesses are not adversely affected by the transition to geographic area licensing and the use of competitive bidding procedures to award paging licenses. Additionally, the Part 90 shared paging channels will not be auctioned; instead they will be licensed on a site-by-site basis. We are establishing licensing areas of a size that will provide realistic bidding opportunities for small and medium-sized operators. We have also adopted special provisions in our competitive bidding rules for small businesses to facilitate their participation in the auction process, including bidding credits and installment payment provisions. In the Further Notice of Proposed Rule Making, we have proposed to allow paging licensees to partition their licensing areas in order to promote quicker build-out of small markets and rural areas.

Thank you for your inquiry.

Sincerely,

A handwritten signature in dark ink, reading "David L. Furth" followed by a stylized flourish.

Mr. Reed Hundt  
Chairman  
Federal Communications Commission  
1919 M Street NW  
Washington, D.C. 20554

Dear Mr. Hundt:

I have received the enclosed letter from my constituent, Lee P. Andrews concerning the recent FCC ruling in WT Docket No. 96-18 relating to MHz paging licenses.

It would be appreciated if you could assist me in responding to Mr. Andrews. In particular, is it possible for his application to be "grandfathered" since it was submitted February 8, 1996, and the freeze was put into effect February 9, 1996? Otherwise, what, if any, are his options at this point?

Please direct your response to my Tulsa District Office. Your help is appreciated.

Sincerely,

  
Steve Largent  
Member of Congress

Mr. Steve Largent  
U. S. Congressman  
2424 21st Street, Suite 510  
Tulsa, OK 74114-1741

Dear Mr. Largent:

I am currently an applicant for a 931 MHz paging license in the Indianapolis, IN market, which application is currently pending before the Federal Communications Commission(FCC). I am writing to urge you to insist that the FCC reverse its February 24, 1997 decision in WT Docket No. 96-18 looking to dismiss my pending application and issue 931 MHz paging licenses in my market solely by auctions in the future.

I paid thousands of dollars for application preparation and filing services and properly filed my application in accordance with the FCC Rules and policies then in effect at the time of filing. The fact that the FCC now wants to change its rules, dismiss my application and hold an auction means that the substantial amount of money I invested in this project will be lost. Neither I nor many other similarly situated applicants who properly filed in good faith have the resources to bid hundreds of thousands of dollars to win an auction license for an entire, big as a state-sized MTA geographic area, as proposed by the FCC.

I will have no opportunity to obtain an FCC license, build a paging station and participate in the communications industry as I hoped to do, and which Congress has committed to seeing happen. I will lose all of my substantial investment to date because the FCC wants to arbitrarily change its Rules after I filed my application. This retroactive action by this Federal agency is not fair, and should not be condoned by Congress. Congress has oversight of this Federal agency and the FCC should be held accountable.

I urge you to conduct an inquiry and take appropriate action on behalf of your constituents and have the FCC correct its action before it is too late. All I am asking is equitable treatment, which in this case could include "grandfathering" of mine and similar applications by the FCC, and appropriate processing and grant of these applications. Such would not interfere with future auctions, as planned by the FCC.

Thank you for your prompt evaluation and intervention on my behalf.

Sincerely yours,

Lee P. Andrews
